

XM Instant Traffic & Weather is such a great feature for travel and planning ahead. I am listening more and more to XM, and enjoying more and more. Competition is the answer to the radio market. I want the reports when I need them and not have to "wade" through 10 to 12 minutes of commercials. Let the market dictate who can air traffic and weather. We have lost so many rights, don't take anymore away from us, the paying customers.
